Designs That Enrich Your Senses

At Mindful Gardens, we craft unique and personal designs that bring your dream garden to life.

Focusing on sensory and mindfulness, our designs aim to stimulate your senses and soothe your mind. We believe that a garden should be a place of peace and tranquillity, and our designs reflect that.

We can create designs in an array of themes suiting all types of budgets, and we will be with you on your mindfulness journey from design concept to realisation.

RTE Super Garden 2024 finalist Gary Hegarty is the designer behind Mindful Gardens.

With a personal interest and passion for sensory and wellness design, Gary wants to highlight the benefits of bringing mindfulness to your outside space and its importance for those who are neurodiverse.

We can recommend a trusted landscape company, or can provide detailed designs for a landscaper of your choice.

Services we offer: Design Consultation
Project Management
Aftercare

Begin your mindfulness journey and book a 45 minute consultation. We will then create a 2D computer generated plan, including planting plan, of your project based on a brief we develop together to bring your dream space to life.

We can provide this service on-site (dependant on location) and virtually, throughout the UK and Rep.Ireland.

What you get with this package:

ONSITE

- 45 minute consultation from Gary.
- A project brief created based on your needs and wants.
- Measurements taken of site.
- Photographs of site.
- Site aspect and soil test to ensure plants will thrive.
- 2D computer generated plan, including planting plan, within 10 days.
- Approximate quotation for the build.

VIRTUALLY

- As above, however client will need to supply photos, measurements, and site aspect. We will of course guide you through this.
- Unfortunately soil testing cannot be carried out, we can however examine the type of soil on site during the consultation.

~~from £150~~

CHRISTMAS SALE PRICE: FROM £110

Begin your mindfulness journey and book a 60 minute consultation, followed by a further 30 minute virtual presentation, at a time of your convenience. We will present our 3D computer generated design of your outdoor space, including planting plan and reasons for plant choices. At this stage, customer input is welcome, and we can tweak the design if necessary.

What you get with this package:

ONSITE

- 60 minute consultation from Gary, plus 30 minute virtual presentation
- A project brief created based on your needs and wants.
- Measurements taken of site.
- Photographs of site.
- Site aspect and soil test to ensure plants will thrive.
- 2D computer generated plan, and 3D generated drawings within 14 days.
- Planting plan and building plan.
- Maintenance plan.
- Approximate quotation for the build.

VIRTUALLY

- As above, however client will need to supply photos, measurements, and site aspect. We will of course walk you through this.
- Unfortunately soil testing cannot be carried out, we can however examine the type of soil on site during the consultation.

~~from £250~~

CHRISTMAS SALE PRICE: FROM £200

EXAMPLE 3D DESIGNS

3D Designs, covering all angles of the garden. We will provide designs which show many different design perspective of the space and a walk through animation so you can be truly immersed in what will be your dream space.

EXAMPLE MAINTENANCE PLAN

In-depth, covering all aspect of the garden maintenance. Such as: Paint and varnish information, pruning timings and techniques, fertilisers and when to apply, tools to use.

Climbing Rose & Shrub Rose

SPRING

To increase flower heads in summer, roses can be fed with a fertiliser (something similar to pe. or right) a minimum of twice a year: once in spring, and once again in mid to late summer.

SUMMER

Feed with fertiliser, increase flower heads by cutting dead or dying flowers from the plant.

WINTER

It is recommended clematis are pruned in late winter/early spring, when the first growth is beginning. This is generally between January and February. Don't worry about cutting back too much. Roses are extremely strong and will grow back.

Above: Cut back stems which look dead, or dying

Hydrangea Grandiflora Half Standard

SPRING

To increase flower heads to summer, hydrangeas can be fed with the same feed used on the roses.

SUMMER

Increase flower heads by cutting dead or dying flowers from the plant.

AUTUMN

Deadhead plant to prepare for winter and new growth in spring.

Jasmine

ADDITIONAL INFO

Next Summer (2024) when the jasmine starts to die down in size, it can be separated and tied in using string around the posts, and trained along the pergola roof. In time, the jasmine will cover the entire pergola roof.

Nepeta

AUTUMN

Cut back after flowering has finished to keep the plant compact.

Verbena bonariensis

ADDITIONAL INFO

Verbena needs very little care, just water in dry spots. They die back in winter and self seed in the spring/summer.

Lavender (see info on page 3)

ADDITIONAL INFO

Not to be confused with the plant beside which is Hebe.
